*The Firm's Media and Defamation disputes practice is recommended by Asia Pacific Legal 500*

---

**Raja, Darryl & Loh** has been involved in numerous defamation cases in Malaysia, having acted for high profile individuals and renowned publications in various media-law related suits.

## Experience and Expertise

We offer general advisory and court representation in matters involving libel and slander, malicious falsehood and contempt of court.

We are frequently consulted by journalists and editors of various newspapers and magazines to provide pre-publication advice in relation to potentially contentious material. Our lawyers have been involved in many cases involving newspaper articles, magazine reviews and articles, letters, business reports, spoken words, statements made outside of Parliament and Court, and other methods of communication, including the internet and electronic mail. In fact, we acted in one of the first few reported internet defamation actions in Malaysia and successfully obtained an order for disclosure of the identities of the wrongdoers from Court.

## Diversity of Clientele

We represent both claimants and defendants in a multitude of media-related cases. Our clients range from ordinary members of the public to professionals to eminent politicians and companies. We also represent a number of publishers from national newspapers to business and society magazines.

## Our Work Ethics

We are tenacious but not unreasonable. Our advice is both pragmatic and rationalised. Our experience in dealing with media related cases allows us to give our clients a realistic assessment of their case so that decisions can be made swiftly and with confidence. We understand the need to balance journalistic and artistic expression with any potential exposure to lawsuits. We also understand the importance of placing our clients in the hands of experienced lawyers with the correct technical and courtroom skills.
